12/14/68

"ona MacMurray

Larry Borenstein introduced me to her late night 12/14/68, at Preservation Hall, where she was with a party. She came aside and we spoke briefly. She is a photographer, had been with International "ouse, had been Banister's sec. when he was on the police department. He arranged for it before he took job. She says he was then nuts, thinks his files were nothing and that what was not destroyed are valueless.

She says that months before he was fired from P.D. he had her take pictures of his locked filing cabinets and then months later made a big stink in the paper by giving them a picture that, he said, meant he was locked out of his own files. When she told the paper the truth, saying "I took that picture", he was angry with her.

I believe she gave "arbara a bunch of her pictures for the Garrison office.
